Dearest Helen;

I received your letter yesterday morning and am wondering what was wrong with you when you wrote it - about eighteen lines and the essence of coolness. I guess something did not please you but sincerely hope that I was not the cause of it. I took the film down and he is going to make the pictures I want but he said that I should not expect too much as he would have to block out Runt and it might not come out good so will you please get a film and have someone take about six close pictures of you and please do it soon. I want to get a good enlargement since you wont have a photo taken.

Dont worry about that play for you will be all right. The fifteen minutes before it starts will be the hardest and when you get out and get started you wont mind it a bit.

I dont think that you have much to kick about for you will have the car and some of the other girls to go around with while I have to work here and than not a pleasure all day long except your letter int the morning to shorten and brighten the day.

What did I say about Runt W that pleased you? I dont blame B a bit in fact I think that she did the right thing. That is the only way to do understand where you

stand and be frank about it. But I am dissapointed in him. He couldn't expect her to fall in love with him only seeing him twice and I thought that he would have the stuff in him to make her realize it if he really did care for her. I guess you know far more than I do about the affair so I wont try to tell you about it.

I dont know any news so I guess I will close with lots of love I am

Your

*Jim*
